

Lead the E-Invoicing shift with Azentio

Mandate-ready and built for UAE compliance, Azentio makes your E-Invoicing transition seamless.

The UAE is transforming invoicing. Will you lead or lag?

The UAE's Federal Tax Authority (FTA) has mandated e-invoicing for all B2B and B2G transactions starting January 2027, via its official E-billing system, built on the Peppol 5-corner model.

UAE E-Invoicing rollout timeline

1 July 2026

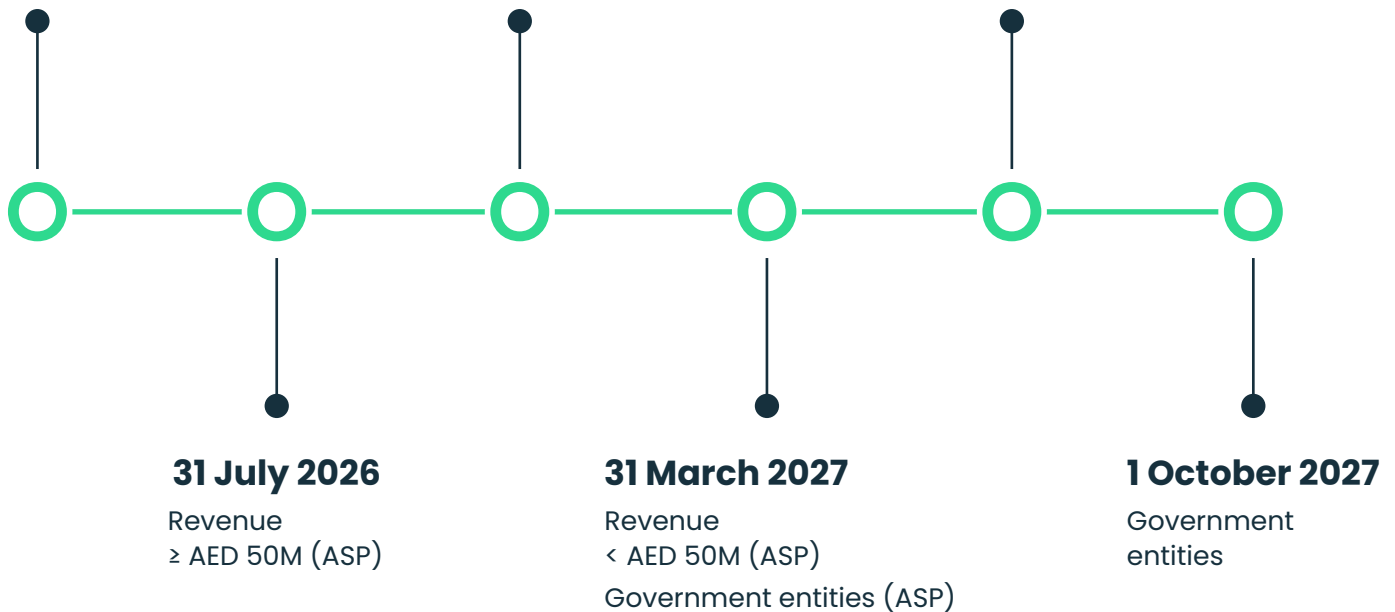

Voluntary adoption
Pilot programme

1 January 2027

Revenue
≥ AED 50M (Go live)

1 July 2027

Revenue
< AED 50M (Go live)

Why you shouldn't wait

E-Invoicing isn't merely a box to check. Businesses that delay risk facing:

Invoice rejections
from the FTA

Financial penalties for
non-compliance

Disconnected,
inefficient systems

Damaged reputation with
partners and tax authorities

Companies that prepare early gain smoother adoption, fewer errors, and stronger operational control. With Azentio, you're not just complying, you're staying ahead.

Who needs to comply – and what's expected

The current scope requires:

- Mandatory coverage for **B2B and B2G** invoice flows
- Connection to the **Peppol network**
- **Real-time validation** and reporting to the FTA
- Use of the **Tax Identification Number (TIN)** for identification
- Support for **cross-border** invoicing
- B2C e-invoicing is not yet required but may follow later

The Azentio advantage

Mandate-ready:

Pre-configured for Peppol and PINT AE standards

No ASP dependency:

Azentio is registering as an ASP, no third-party required

Full control:

Native integration ensures seamless operations

Audit-ready:

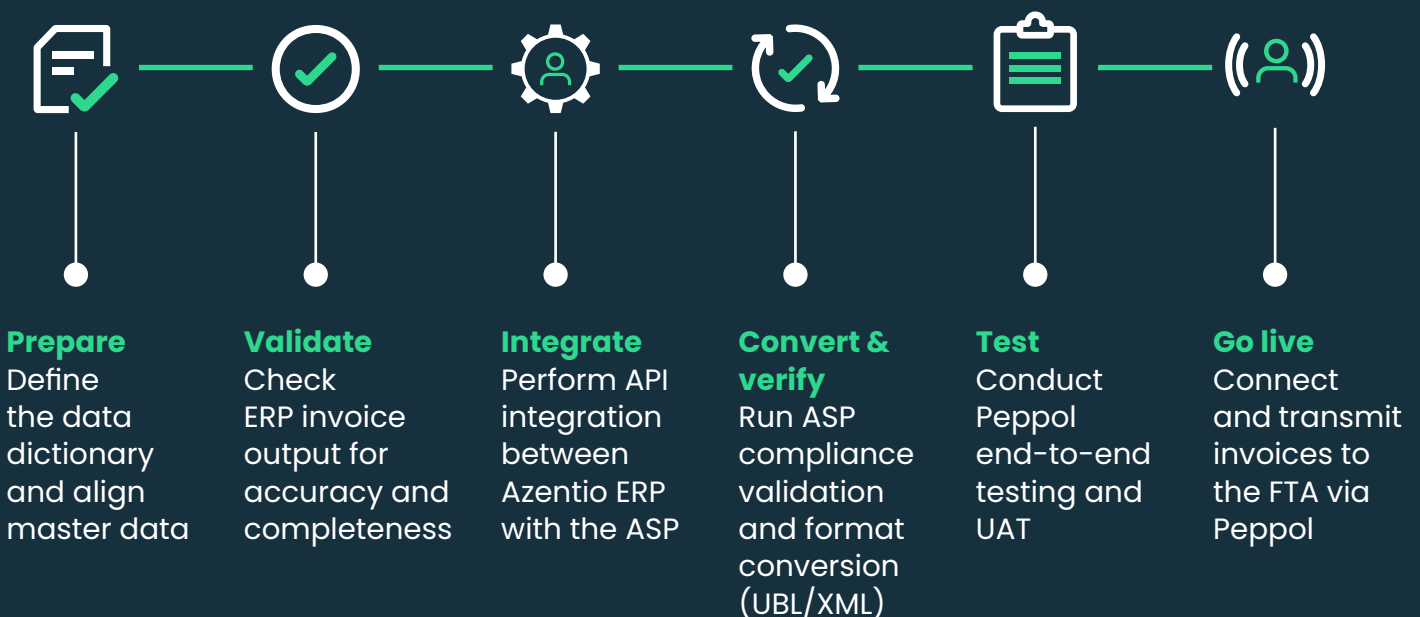

Status-logged and FTA-complaint storage

CXO-friendly:

Dashboards, smart alerts, and powerful analytics

Your path to compliance

Azentio manages your end-to-end e-invoicing implementation without disrupting your operations.
